TRANSLATION ENGLISH TO SPANISH II

General Description

Translation II: Specialized Subjects deals with the new approaches to language learning that view the activities of translation and interpreting as a tool for the development of communicative ability and mediation skills. Therefore, during this course the students will carry out written and oral tasks to transmit a particular piece of information to speakers and students of Spanish who are not fluent in the English language. The informative content and the type of texts on the course will be related to different, real communication situations but, in difference to the Translation I course, within more specialized areas of the language.

On the other hand, this translation context will serve to cover a second aim: the students will develop the skills necessary for the translation process or they will perfect those acquired in the Translation I course, through the analysis and implementation of aspects relating to the use of documentation, translation strategies, the tools and resources for the translator, pragmatic and textual considerations, among others.
