SCIENCE AND TECHNOLOGY

HEALTH SCIENCES AND PUBLIC HEALTH

IN SPAIN

## HEALTH SCIENCES AND PUBLIC HEALTH IN SPAIN

### GENERAL DESCRIPTION

This course is intended to; on the one hand, offer a generic view of the most important aspects of the Spanish health system and its comparison with other European systems, as well as their institutions and to cover some specific aspects of diseases of interest, in a context of scientific and technical vocabulary. On the other hand, the course also aims to identify what factors, together with the health system, determine the level of health of a population. The relative importance of these factors will be analyzed on the basis of the socioeconomic characteristics of a country, as well as the interventions that are made for prevention and control by the public health system.
